Wayanad, Kerala

Professional Summary

Full Stack Developer with experience in creating scalable and user-friendly web applications using Django, Python, ReactJs, and JavaScript. Skilled in building REST APIs, managing cloud deployments, and designing efficient databases. Strong in problem-solving, collaboration, and adaptability, with a commitment to delivering high-quality solutions in fast-paced environments.

Skills

- **Languages:** Python, JavaScript, HTML, CSS
- **Frameworks:** Django, DRF, ReactJS, Redux
- **Databases:** PostgreSQL, MongoDB
- **Web/Cloud:** REST APIs, AWS EC2, NGINX, Gunicorn
- **Tools:** Git/GitHub, Firebase, WebSockets
- **Professional Skills:** Problem-Solving, Communication, Team Collaboration, Adaptability, Time Management, Attention to Detail

Education

B.Com in Computer Application *2021–2023*
Don Bosco College, Sulthan Bathery, Wayanad

Python Course *2023–2024*
iHub Institute, Hyderabad, Ammeerpet

Full Stack Development Program *2024–2025*
Brototype, Kochi, Kerala

Projects

E-Commerce Fashion Store for Women *June 2024 – July 2024*
Tech Stack: Django, Python,PostgreSQL, AWS, NGINX, Gunicorn
Git Repository
- Built a scalable e-commerce fashion platform with secure checkout and responsive design.
- Implemented product catalogs, filtering, sorting, and category navigation.
- Integrated Google OAuth with admin dashboard.
- Developed shopping cart, wishlist, and order tracking with real-time inventory updates.
- Configured payment gateways and automated email notifications.
- Deployed on AWS EC2 with NGINX and Gunicorn.

User Management System *Jan. 2025 – Feb. 2025*
Tech Stack: Django, DRF, PostgreSQL, ReactJS, Redux
Git Repository
- Built a user management system with authentication, role-based access, and secure profile management.
- Developed REST APIs integrated with ReactJS frontend.
- Implemented secure login, registration, password reset, and JWT authentication.
- Admin features for managing users, roles, and permissions.

OLX-Clone *Mini Project*
Tech Stack: ReactJS, Firebase
Git Repository
- Developed a classified ads platform resembling OXL.
- Implemented user authentication, ad posting, and dynamic category filtering.
